POETRY.

A GOOD DEED IMPERISHABLE.

BY JAMES LUMBARO.

How brief is the life of the delicate rose
That loves the warm kisses of May;
For, scarce do its leaflets of velvet unfold,
And it withers and passes away!
But after the spoiler has darkened its doom,
And it moulders in darkness and death,
The air still retains the exquisite perfume,
That it gave ere it yielded to death.
Like the flowerer's, our mortal existence is brief,
And is like it divested of pride;
Its few fleeting moments of gladness and grief
Are soon whelmed in eternity's tide!
But oh, all the glorious deeds we perform,
Shall live on, like the blossom's perfume,
And be treasured in hearts that are grateful and warm,
Long after we sleep in the tomb.
Then say not that life, though its moments de-
part
Like the dew at the coming of day,
Has nothing to stay the fond hope of the heart
That would live, after passing away!
Each deed that we do for the true and the right,
With a purpose unshaken and high,
Is given in characters living as light
In hearts where it never shall die!

RECIPTS.

VERY GOOD OLD-FASHIONED BOILED CUSTARD.—Throw into a pint of a fresh new milk, the very thin rind of a half lemon, and let it infuse for half an hour, then simmer them together for a few minutes, and add four ounces and a half of white sugar. Beat thoroughly the yolks of four-teen fresh eggs, mix with them another half pint of new milk, stir the boiling milk quickly to them, take out the lemon peel, and turn the custard into a deep jug; set this over the fire in a pan of boiling water, and keep the custard stirred gently, but without ceasing, until it begins to thicken; then move the spoon rather more quickly, making it always touch the bottom of the jug, until the mixture is brought to the point of boiling, when it must be instantly taken from the fire, or it will curdle in a moment. Pour it into a bowl, and keep it stirred until nearly cold, then add to it by degrees a wineglassful of good brandy, and two ounces of blanched almonds, cut into spikes; or omit these, at pleasure. A few bitter ones, bruised, can be boiled in the milk in lieu of lemon peel, when their flavor is preferred.

New milk, 1 quart; rind of 1 lemon; sugar, 4 1/2 ounces; yolks of eggs, 14; salt, 1 saltspoonful.

COMMON BAKED CUSTARD.—Mix a quart of new milk with eight well-beaten eggs, strain the mixture through a fine sieve, and sweeten it with five to eight ounces of sugar, according to taste; add a small pinch of salt, and pour the custard into a deep dish with or without a lining or rim of paste, grate nutmeg or lemon rind over the top, and bake it in a very slow oven from twenty to thirty minutes, or longer, should it not be firm in the centre. A custard, if well made, and properly baked, will be quite smooth when cut, without the honey-combed appearance which a hot oven gives; and there will be no whey in the dish.

New milk 1 quart; eggs 8; sugar 5 to 8 ounces; salt 1 saltspoonful; nutmeg or lemon-grate; baked, slow oven, 20 to 30 minutes, or more.

Flogging out of the Navy.

While so much is said about abolishing flogging in the navy, is it not proper to notice the numerous floggings which take place out of the navy?

The sailor who enters the service knows the condition of his obligations; but there are others, whom the law is supposed to bind, who suffer severely from hard masters—the apprentice, for example. Men of bad temper and malignant dispositions inflict the severest chastisement on their apprentices for the least breach of duty. Few can know the extent of this class of flogging, for the helpless apprentice cannot stand up against the power of the master, and has very little hope of redress. School-masters frequently flog their scholars severely. Parents, of a rough, ungenerous nature, flog their children sometimes unmercifully, to make them affectionate, obedient, and dutiful. Men beat their wives and each other in passionate quarrels. In short, such is the infirmity of our natures that flogging in the navy is not the only place in which such powerful corrections are practised. If we redress the wrongs of one, why not extend the same protection to all? In all classes and conditions, it is much better to practise the soothing system and moral suasion than have recourse to the whip, the whaler, or the ferule—at least, we have a thought so.

AGRICULTURAL.

Grafting and Improvement.

The address of J. R. Williams, before the Kalamazoo Agricultural Society, Michigan, remarks on the ease which every man may improve the quality of his fruit, and says:—
"As it is with animals and vegetables, so it is with fruits. You can have stunted, astrigent, crabbed fruits, or the most delicious. The precaution to send your neighbor's boy to snip off a shoot from a fine tree, while you are stopping to decide the affairs of the nation with him—a few minutes taken to slide it under the bark, while you are waiting for a meal at home, will transform a useless shoot into a valuable tree, that shall furnish pleasure and nutriment to generations of men. A few minutes improved now and then, which would be otherwise idled away, will surround your dwelling with a grove, which shall prove of the greatest utility, and delightful embellishment. I know men say they have no time, yet I have always observed that the men who make this excuse, have plenty of time to lounge at the tavern—plenty of time to run after some mountebank or charlatan—plenty of time to litigate with a neighbor. No, man! plant the tree. It will grow while you sleep.—Bud it. Graft it, and it shall gladden the sight and please the palate of people yet unborn, and you shall have a memorial of your existence, springing from the green sod, when you shall repose beneath it."
Some five or six years ago, I found on the place where I reside, some scrubs of natural fruit. The tops of my trees, my neighbors said, were too large to graft.—But they were grafted with considerable labor. My predecessor might have budded or grafted me with a single germ, and saved me nineteen-twentieths of the time and expense. Another set of men told me the country was not natural for fruit. I put in the grafts, and for years have had an abundance of delicious fruit for the table or for cooking, for myself and my neighbors, in summer, fall, and winter; and I find none will eat it more greedily, than those who have no time to graft their own trees, and who characterize the climate as unfit for fruit.

The Domestic Angels.

Women have been called angels, in love tales and sonnets, till we have learned almost to think of angels as little better than women. Yet a man who knows a woman thoroughly, and loves her truly (and there are women who have been so known, and loved)—will find, after a few years, that his relish for the grosser pleasures are lessened, and that he has grown into the fondness of the intellectual and refined without an effort and almost unawares. He has been led on to virtue through his pleasures; and the delights of the eye, and the gentle play of that passion which is the most inward to our nature, and which keeps much of its character amid the concerns of life, have held in a kind of spiritualized existence; he shares his very being with one who, a creature of this world, and with something of this world's spirit, is—
"Yet a spirit, and bright
With something of an angel light."

With all the sincerity of a companion-ship of feeling, cares, sorrow and enjoyment, her presence is as the presence of a purer being, and there is that in her nature, which seems to bring him nearer to a better world. She is, as it were, linked to angels; and in his exalted moments, he feels held by the same tie.

A Word to Young Men.

Wishing and sighing, imagining and dreaming of greatness, said William Wirt, will not make you great. But cannot a young man command his energies? Read Foster on decision of character. That book will tell you what it is in your power to accomplish. You must gird up your loins and go to work with all the indomitable energy of Napoleon scaling the Alps.

Franklin, in the midst of his labors, had time to dive into the depths of philosophy, and explore an untrodden path of science. Frederick the Great, with an empire at his direction, in the midst of war, and on the eve of battle, found time to revel in the charms of philosophy, and feast on the luxuries of science.

Napoleon, with Europe at his disposal, with kings at his ante-chamber, and at the head of thousands of men, whose destinies were suspended on his arbitrary pleasure, found time to converse with books.

And young men who are confined to labor or business even twelve hours a day, find an hour and a half of what is left, and which will amount to two of the course of a year.

SELECTED TALES.

CHARLES ELLISTON.

A CAPITAL STORY.

"I must leave this place to-night; I can bear their marked neglect and open taunts no longer," said Charles Elliston, and he left the richly furnished parlor, where, with some fashionable guests sat Mrs. Merton and her two eldest daughters, and went forth into the garden. "Yes, must go," he continued, no one cares for me; and why should they for the penniless being, whose very origin is unknown? Alas, how hard it is to be thus cast upon the world friendless, and beloved by none—none—none!"
And he buried his face in his hands, overcome with the intensity of his feelings.
"None, Charles!" said a clear, silvery voice behind him, while a hand was gently laid upon his shoulder.
He started, and turning round, said—
"Yes, yes, Helen, pardon me, I spoke unthinkingly. You still love me?" he asked inquiringly.
"I do, Charles, and my father—"
"Yes, your father, my noble benefactor, Helen. He still loves me."
"Then, why leave us, Charles?" she said in a tender tone.
"Because, Helen, you know I have already been the cause of much dissension in your family—God forbid that I should be so any longer. And besides, Helen, you know what treatment I have received from your mother and sisters. I have borne it long out of respect to your father, and love for you, but I can bear no more. I will go forth into the world in hopes of building up a fortune, and say, Helen, if I should be successful and return, will you—"
"I will love you still," she said, interrupting him. Oh, I will always love you, Charles."
"Farewell," said he.
And imprinting a kiss upon her rosy lips, he tore himself away. In another hour he had quitted the house where he had spent so many happy days with Helen.

Charles Elliston was a dependant upon the bounty of Mr. Merton. He had found him one day when about four years old, wandering about the streets of the city, a lost child. He kindly took him home, and used every endeavor to discover his parents, but all to no purpose. At last, finding his inquiries were useless, he raised and educated him as his own.

Unlike her husband, Mrs. Merton was of an aristocratic, proud spirit, who could not bear one whose birth was so uncertain as that of young Elliston. She had diffused some of this spirit into her eldest daughters; but Helen, the youngest, like her father, possessed a kind and noble heart, and looked only with compassion and love upon the poor, though noble youth.

He was now about seventeen years of age, and the insults that were heaped upon him were felt severely. It is true, when Mr. Merton was present, none dare show the least disrespect towards him, but this only served to make him feel it more acutely in his absence.

It was on this very mentioned evening, that a new insult had been offered to him, and he determined not to live another day where he was exposed to them. Nor would it have caused him one feeling of regret, had it not been for Mr. Merton and Helen; but however dear they were to him, he resolved to leave them. He left too, without informing Mr. Merton, for he well knew that he would insist upon his staying, and he would not be the author of discord in that family where dwelt the only two on earth he could call his friends.

It was near the close of a summer's day, that a steamboat touched the wharf of one of our Southern cities, and from its crowded decks poured a stream of weary travellers eager once more to set foot upon the land. Among the last who stepped on shore was a tall youth, with a valise in his hand, who walked slowly from the landing and bent his way towards the shipping warehouses along the wharves. But, alas, he was a stranger and had no recommendations.

With a dejected mein, and sorrowful step, he was about giving up all hopes, when he came to a large warehouse he had not before entered. He walked into the counting house where sat a gentleman apparently about forty years of age. To the youth's inquiry whether he was at the head of the establishment, he replied in the affirmative.
"What do you wish, my lad?" he inquired.

"Do you want a lad to assist in your store? I have no recommendations to offer you, sir," he continued modestly. "I have just arrived in the steamboat from the north

and have neither money nor friends. I cannot even buy a lodging for the night.

And seeing the merchant look credulously at him, he could contain himself no longer, but said imploringly—
"Oh, sir, do not refuse," and the tears trickled down his cheeks.

The merchant, touched by his grief, and convinced by the openness of his manners, hesitated a moment, and finally took him to his house. A few days proved the truth of the youth's story, and he was employed at once by his new benefactor.

In the course of time he rose by degrees until he became head clerk in the establishment of Mr. Thompson. He also, by his amiableness became the favorite of the wealthy family of the employer with whom he resided. All loved him, and he loved them in return as father, mother, and sister. For although Charles (for it was Charles Elliston) thought that Emma Thompson was almost as beautiful as his own Helen, yet he still remained faithful to the latter, and could but think of the former as a sister.

Five years rolled by, and he had now become proprietor of the large establishment which he had entered as an errand boy, Mr. Thompson having retired from business.
One evening he was sitting in familiar conversation with the family, when Mrs. Thompson, after looking steadfastly at Charles for some time, remarked how much Emma and he resembled each other.

"Yes," said her husband, "I have often observed it—they look as much alike as though they were really brother and sister. Our Charles—poor little fellow, could not have been more like Emma."

"Your Charles? I never knew you had any other child besides Emma," said Charles. "When did he die?"

"Would to God he had died!" exclaimed Mrs. Thompson; "then would I have known he was in Heaven; but now perhaps he is buffeted about by strangers, whose hard hearts can seldom feel like parents."

And then she gave vent to her feelings in tears.

"He was lost, then?" asked Charles.

"Yes," said Mr. Thompson. "About seventeen years ago, Mary and myself travelling north for the benefit of our health, to visit some friends in New York city, took with us our little Charles, who was scarcely four years old, and then our only child. We arrived there in safety, and after staying with our friends some time, set out on our return home. Anxious to prosecute our journey, we immediately on our arrival took the steamboat to proceed on. I went to see to the safety of the baggage, thinking that my Mary and Charles were in the cabin, but what was my surprise, when on going into the cabin some time after to find Mary there alone. She thought I had Charles with me, and she swooned away when I informed her that I had not. We searched the boat over, but no Charles could be found, and then it struck us that he had wandered on shore before the boat left the wharf, and consequently was left behind. How harrowing were our thoughts! to think that every minute the distance was increasing between us and our dearly beloved child. But there was a thought still more distressing. Perhaps he had fallen overboard, unseen, and was drowned. However, I determined, on arriving in New Orleans and leaving Mary with her friends and relations, to return to Philadelphia and spare no pains or expense in trying to discover his fate; but the great mental excitement and bodily fatigue I had undergone, threw me into a fever on the way, and it was several months before I recovered. When I did, and arrived in Philadelphia, no trace could be discovered of our child, and never since have we heard anything concerning him. But God be praised, Charles, he has given us a son in you."

"But was there no mark by which he could have been known if he had been left behind, as you first supposed?" asked Charles, eagerly.

"Yes, there were scars of a dog's teeth on his left wrist, and beside he wore a locket—a birth-day present from his father—around his neck, with 'Charles' engraved on it," said Mrs. Thompson with tears in her eyes.

"Then, father, mother," said Charles, raising his arm and drawing from his bosom a locket, which he threw into Mrs. Thompson's lap—"behold your long lost son!"
For an instant they stood amazed—the next they were locked in each other's arms. Then turning to Emma he for the first time pressed to his bosom a sister.

How different was his situation now from

what it was the day on which he first set foot in New Orleans. Then he was poor and friendless, with scarce a place to rest his head—now he was wealthy, surrounded by friends, and blessed with a father's, mother's and sister's love. He would claim now what her noble father would not have refused, even to the poor youth, had he asked it—Helen's hand; and even her proud mother would not object to receiving for her son-in-law, the heir of the richest merchant in New Orleans.

Mirth and music resounded throughout, and gladness reigned predominant in the splendid mansion of Mr. Merton. It was the birth-night ball of his beautiful and accomplished daughter Helen, given on her nineteenth birthday, and the magnificent saloons were thronged by the youth, beauty and elite of the metropolis. All paid willing homage to her fascinating charms. Nor beneath their fervent congratulations did there lurk aught of malice or envy; for the sweet disposition and gentle manners of Helen Merton had won the good will of all who knew her. And as now she replied to their warm-hearted wishes, she looked more beautiful than ever. She was attired in a plain white dress, looped with roses, and fitted exquisitely to her finely moulded form; her shining chestnut curls were confined by a costly diamond band, that sparkled on her forehead, rivaling the transparent beauty and clearness of her complexion.

At times, when she would mingle in the giddy whirl of the dance, a smile would play upon her lovely features; but when over a melancholy expression would steal into her laughing eye, telling something was yet wanting to complete her happiness. She was thinking perhaps, how he, who many years ago had won her maiden love, might, while she was surrounded by wealth and luxury, be dragging out the prime of his life in poverty and distress. Yes, she still remembered the companion of her childhood. Such is woman's constancy and love. Alas, that it should be so often abused.

The evening was somewhat advanced, when Mr. Merton approached Helen, locked in arm with a young man, whose dark countenance, raven hair and eyes, and tall straight form indicated a native of the south.

"Mr. Thompson, of New Orleans, my dear," said Mr. Merton.

And then, after conversing a few moments, he sauntered to the opposite side of the saloon.

"Who is that handsome young man you just introduced to Helen?" asked Mrs. Merton of her husband.

"That is Mr. Thompson of New Orleans, the richest merchant in that city, and his father was before him. He arrived here but the day before yesterday. I was introduced to him yesterday, and invited him here to-night, and if the impression is not felt on Helen's heart, which has hitherto been so callous, none ever will regret the disappearance of —"

"Your protégé, Charles Elliston," said his wife sarcastically.

Mr. Merton did not answer her, he only turned away.

At first when the stranger was introduced to Helen there appeared an air of embarrassment; but it gradually wore off, and he entered into conversation with his usual vivacity. In the course of it she asked him if he had ever been in the city before.

He replied that he had been when he was about seventeen years of age, and that he had then become acquainted with several of his own age, whose acquaintance he highly prized. Among those he mentioned was that of Charles Elliston in particular.

As he pronounced the name, he bent his dark eyes full upon her, and perceived that she started, while for an instant, agitation was visibly depicted on her countenance. After a moment's pause, he continued—

"But I have made inquiries since my arrival, respecting him, and hear that he has returned the kindness of his benefactor, your father, with ingratitude, by leaving his house and going no one knew whither."
"Oh no, sir, do not believe that; it is an idle report. He had reasons for leaving my father's house," and her voice trembled and a tear stood in her eye.

Just then a gentleman advanced to claim her hand for the cotillon, and the conversation was abruptly terminated. Charles resigned her silently, but his heart was full.

It is strange how the lapse of a few years between youth and manhood will change the face and disguise the form; the slight strippling that a little while ago clambered on our knee, we can scarcely recognize in

the full, stately form, and staid demeanor of the man. So it was with Charles Thompson, and no wonder that Helen and her father could not see, in the rich merchant from the south, the poor lad, who six years before, had left them with scarce a dollar in his pocket.

It was the morning following the ball, and Mr. and Mrs. Merton and Helen were sitting in the parlor, the former two engaged in discussing some private affairs, the latter with her head resting upon her hand, apparently in deep thought. The servant entered and handed Mr. Merton a letter. He opened it, and after having perused it for a few moments, uttered an exclamation of joy. Both his companions looked up. Seemingly overcome by the excitement of some unusually pleasing news, he approached his daughter and gently patting her up on the cheek, said—

"Come, come, Helen dear, cheer up.—Charles, our own dear Charles, has returned; he is in the city, and will be here in half an hour. Cheer up, my dear."

And he began to pace the floor.
"See here," he continued, as a splendid equipage drove up to the door, from which a young man alighted, "here is Mr. Thompson too; how glad I shall be to introduce them to one another."

"I don't see why you should be," said his wife, "though perhaps your Charles, as you call him, may be as rich as Mr. Thompson. You know his left word that he was going to seek his fortune."

And she pronounced this last word with a sneer.

"And he hopes he has found it madam," exclaimed Charles, who entered just at that moment; "thanks to an almsive Providence that directed me to my father's house. It is Charles that stands before you."

With a shriek of delight, Helen threw herself into his outstretched arms, and wept tears of joy on his bosom; and the old man stood motionless but his eyes were wet, and his lips quivered, but not with grief.

When they had become somewhat composed, Charles related to them what had occurred since he left them. The joy that beamed in the swimming eyes of the delighted, as she hung fondly on her lover's arm, was only equalled by the tenderness with which he returned her look of affection. How deep was the bliss of that moment, making amends by its delight, for the long years of doubt and absence. It was not long before Charles renewed again the boyish vows he had pledged to Helen, and the blushing girl listened, smiling and weeping by turns.

Need it be added that in a short time Helen and Charles were united at the altar, and that even the aristocratic mother smiled upon the union of her daughter with the disdained Charles Elliston.

Remarkable Discovery.

A discovery to archaeologists has just been made near the village of Ormay, Oise. A piece of land covered with large rocks of hard stone, was purchased by Renaud Renard, who set men to work to break them for sale. After blowing up several small ones, he began to attack the largest, in doing which he discovered behind it the entrance to a solid constructed vault, in the center of which were two skeletons completely dressed in bronze armor, with conical helmet round buckle, ornamented in the center with a knob incrustated with gold, and a belt formed of plates incrustated with silver. The quiver and lances, which were in bronze, were intact. Near the stone which served as the pillow for the skeletons, were found six large vases made of very thick black earth, ornamented with mythological figures painted in white and light blue. The largest of the vases was 45 centimetres in height, about 18 inches English. In the smallest was found a leaf of thin gold, about 10 centimetres long, on which is traced an emblem of 150 small characters, exactly resembling those on Celtiberian medals, and in others were found five small beetles, one stone, and the rest in a kind of blue earthenware, and all having a wild boar engraved upon them.—The walls of the tomb bore traces of paintings representing warriors on horseback and on foot, and a banquet, and on the roof the disk of the sun with large wings. A rich gentleman at Crepen has offered a considerable sum to M. Renaud Renard for the articles discovered, but the latter has refused it, intending to present them to the museums of Paris and Amiens.

BRO-BUGS.—The solution of the chloride of zinc is an effectual remedy against bed-bugs. It is applied with a brush, and is the discovery of Sir William Burnett.

WASHINGTON, Friday, May 10.
HOUSE.—Several Senate bills were received and referred.
 The House went into Committee of the Whole, and took up the private calendar.
 The deficiency bill with the Senate amendments was taken up. After a warm opposition, in which several members took part, the amendments were adopted.
 The House then adjourned to Monday.

WASHINGTON, Monday, May 13.
SENATE.—The galleries and floor densely crowded, Mr. Clay expected to speak.
 Mr. Dickinson introduced a bill authorizing the coinage of a Cent piece composed of copper and silver, the coinage of a three cent piece, and to secure the re-coinage of the small Spanish and other foreign coins.
 At about 1 o'clock the Senate proceeded to the consideration of the bill to admit California into the Union, establishing Territorial Governments for New Mexico and Utah, and making proposals to Texas, for the settlement of her Western and Northern boundaries.

Mr. Clay proceeded with a statement of the sentiments prevailing in the Committee at their several meetings. He spoke two hours and in conclusion expressed his conviction that the propositions of the Committee would succeed. He would almost stake his existence that, if presented to the people to-morrow, it would receive an almost unanimous approval. When he had concluded the Senate adjourned.

HOUSE.—After some unimportant business the House went into Committee of the Whole on the California Message.

Mr. Clark, of N. Y., proceeded to show that the free States are more populous, enterprising, inventive and patriotic than slave States, and this is the reason why territory now free should remain so. In conclusion he said he was glad California was here, with her constitution, claiming rights which were secured to her by treaty, and he stood ready to welcome her, with the boundaries prescribed by herself.

Mr. Savage, of Tenn., next spoke and justified slavery. He opposed the admission of California, but may vote for it in connection with the bill giving governments to territories.

The Committee rose and House adj'd.

WASHINGTON, Tuesday, May 14.
SENATE.—The Deficiency Appropriation Bill was reported back from the Finance Committee, with a recommendation that the House amendments be concurred in, which was agreed to.

After the transaction of the morning business, the Census bill was taken up.

The important amendments, giving the act a perpetual efficacy, and fixing the number of Members of the House of Representatives at 233, were both agreed to.

The Senate voted to adhere to its own Statistical Tables, so the bill goes back to the House. After a brief Executive session the Senate adjourned.

HOUSE.—After a sharp struggle it was agreed to close the debate on the President's California Message on the second Tuesday in June.

The House then went into Committee of the Whole and took up the California bill.

Mr. Wooman, of Va., spoke in favor of the admission of California as an independent measure, and not mixing her up with others.

Mr. Julian, of Ind., made a calm and decided Anti-Slavery speech. Adjourned.

WASHINGTON, Wednesday, May 15.
SENATE.—A memorial was presented praying that a national vessel may be granted to carry the delegates to the world's peace convention to be held at Frankfort-on-the-Main.

The Senate then resumed the consideration of the bill for the admission of California and the establishment of Territorial Governments. An interesting passage took place between Mr. Davis, of Miss., and Mr. Clay, the former attempting to strengthen the compromise with a new provision in favor of the extension of slavery into the Territories. Mr. Yulee then made a speech against the compromise. He was followed by Mr. Foote who spoke in favor of the compromise, after which the Senate adj'd.

HOUSE.—No business of importance was transacted. Several motions were made but ruled out of order.

The motion of Mr. Brooks, to reconsider the vote by which the communication from the Secretary of State (enclosing the letter of Sir Henry Bulwer, relative to the coasting trade of this country, etc.) was referred to the Committee on Foreign Affairs, was acted upon. The debate was participated in by Messrs. Calvin and Morse, of Penn., Barry, of Va., and McLane, of Md. The House, however, adjourned without taking a vote on the amendments proposed.

WASHINGTON, Thursday, May 16.
SENATE.—The consideration of Mr. Clay's resolutions was resumed. Mr. Davis modified his amendment without changing the object.

Mr. Foote gave notice of an amendment which he should offer in case Mr. Davis's should fail.

Mr. Clemens gave notice of another amendment in favor of settling the boundaries of Texas and removing the Indians.

Mr. Foote spoke two hours, following out the views he expressed yesterday.

Mr. Clemens attempted to reply, amid numerous interruptions, but gave way to an Executive session. Adjourned to Monday.

HOUSE.—Mr. McLane reported the Canadian reciprocity bill, accompanied with the correspondence of Mr. Bulwer. Mr. Bulwer's correspondence is highly favorable to the project. After much struggle and confusion, it was referred to the Committee of the Whole.

A communication was received in answer to the inquiry of the doings in the disputed territory of New Mexico. Also one from the Secretary of the Treasury respecting State Banks, with valuable statistics.

The House concurred in the Senate's amendment to the coinage bill.

A Committee of Conference was ordered on the census bill. Adjourned.

The Arctic Expedition vessels now at the Navy Yard, Brooklyn, are taking in their stores and will sail in a few days. There has been no difficulty in enlisting men for the service. There have been more applicants than there was room for. Both the Advance and Rescue have been equipped, and transferred to the Navy Department and their officers appointed as follows: Of the Advance, Lieut. De Haven, commanding; Wm. H. Muddagh, passed midshipman; W. S. Lowell, midshipman. E. K. Kane passed Asst. Surgeon, is expected to join the expedition soon. The following are the officers of the Rescue: S. P. Griffin, passed midshipman, commanding; R. R. Carter, passed midshipman, Henry Brooks, boatswain, detached from the North Carolina: One of the vessels will have a crew of 15 men; the other, thirteen or fourteen. Of a large number who volunteered for service, a small portion were considered suitable. Both vessels are receiving their stores at the Brooklyn Navy Yard, and will probably be fully equipped, in provisions and men, by the last of this week. Mr. Colby, the inventor of the Double Needle compass, (which is supposed to be uninfluenced by local attraction) has presented two of his instruments to the expedition with the design of testing their qualities.—N. Y. Express.

JOHN H. W. HAWKINS, the well known "Baltimore Washingtonian," has just returned from a lecturing tour at the West and South. He related to us an incident which occurred last week at Washington, through his agency—being the entire banishment of intoxicating liquor from the Capitol.

Mr. Hawkins being satisfied from appearances that liquor was sold in the building, notwithstanding assurances to the contrary, he on Monday of last week searched out the "den of iniquity." It was located in the cellar, in a place originally prepared for coal or ashes, and was kept by a man named Butler, from Texas, who obtained permission from the Vice President, on application of certain honorable Senators, to vend refreshments, and spirit being expressly prohibited. But when the veteran teetotaler called for "oysters," the keeper unwittingly set a trap for himself by insinuating in a whisper that he also kept "something else." Brandy was then produced, which Mr. Hawkins paid for and quietly bottled up, and with this "evidence in his pocket," reported the fact to Mr. Fillmore. On Wednesday last, the Vice President sent the Sergeant-at-Arms to summon Butler before him, when the fellow stoutly denied that he had at any time violated his contract by keeping liquor—that he was "above the business," &c. Mr. Hawkins now refreshed his memory by relating the "oyster and brandy" incident, in a tone somewhat louder than a whisper, and exhibited the identical liquor purchased of him. Butler looked at this, as if he wished he were back in Texas, and the Vice President kindly gave him "leave to withdraw" thither, or elsewhere. There is now no liquor sold in the Capitol—thanks to the moral courage of Mr. Hawkins.

Boston Transcript.
 THE PROSPECT for a good harvest of fruit of every kind this season, appears of unusually good, and as the warm weather is setting in, we shall probably have nothing to destroy the prospect. We hear in all directions, that the trees, apple, pear, peach, cherry, &c., are heavily freighted with buds—having thus far escaped unharmed. The fears which some entertained that a nipping frost would kill the germs, have not been realized—and the buds have burst forth into blossoms all around us. Much attention has been given within a year or two to arbor-culture, and we may expect an unusual supply of fruit this season in our own gardens and orchards. The prospect is that New England will this year raise apples, pears, and peaches enough to supply the home demand, and to spare—without sending to New Jersey and New York for a supply.—Lowell Journal.

PATENT HOOPS.—A machine has lately been invented for making hoops, which bids fair to do away with the necessity of growing hoop poles hereafter. Any tough, straight-grained timber will answer the purpose. It is first sawed into square strips, the width desired for the hoop; the strips are next turned round, like a hoe handle, and then slit through the centre. Each strip thus made two round hoops. They are then steamed and bent. Casks hooped with them present an extra neat appearance. The whole work is done by machinery. Just previous to wetting them, it is necessary to wet them in cold water. A specimen of these hoops was exhibited at the late State Agricultural show at Syracuse.

Syracuse Journal.
 DURING THE SHOWER on Monday evening last, in Brunswick, Me., over one hundred panes of glass were broken in the dwelling house of Mr. W. Simpson, in the westerly part of that town a child was knocked from a chair, and a lady, sitting at the window, stunned by a stroke of lightning but no other marks of its power were visible. The glass was all broken inwards. In one place on the road, eleven out of twelve telegraph posts were shivered to pieces, and several of them entirely prostrated to the ground.—Boston Post.

HUMAN LIFE AND PULSATION.—It is stated that the human life can be estimated by the pulsation a man performs. Thus, allowing 70 years for the common age of man, and 60 pulses in a minute for the common measure of pulses, the number of pulses in his whole life would amount to 2,207,520,000.—But if, by intemperance, he forces his blood into a more rapid motion, so as to give 75 pulses in a minute, the same number of pulses may be completed in 56 years.

A LADY OF MONTGOMERY COUNTY, Md. Mrs. Case, lately became the mother of three children, and died in giving birth to the fourth. The three babes are alive and doing well.

It has already been reported, says the New York Post, that the steamboat St. Louis, which stopped at Memphis lately, had several deaths by cholera on board; and any one who will read the following paragraph from the Memphis Eagle will see that the suddenness and fatality of this manifestation of the disease, is easily accounted for.
 "What causes this mortality? What superinduces this sudden and fatal disease? If any one had asked us these questions while on board the St. Louis, we would have pointed him to the five or six hundred emigrants crowded together upon a deck, yet further encumbered by numbers of Texas mustangs and mules destined to the use of California emigrants. Vast as is the capacity of the boat, these tested it to the last square foot of space. How, in the name of Heaven, all these human beings slept, is a mystery to us. In one berth we saw three grown persons and two children! In another, four grown persons—in none less than three; and every square foot of the floor seemed fully occupied by a host of men, women and children standing. The throng was necessarily dirty, the stench was overpowering, and there seemed not one joyous or smiling human being in the whole collection. No wonder that disease, of terrible and certain fatality, comes into such floating Black Holes of Calcutta, where the air reeks with the deadliest miasma, and there is not even space for the most ordinary requirements of human nature. Is there any wonder that, under such circumstances, human beings should die? Is it not surprising that any should escape from such terrible imprisonment with life.

ANOTHER OUTRAGE.—It will be recollected that two or three weeks since, we gave an account of an outrage committed upon a young lady on Pearl street, in which she was knocked down, gagged, robbed, her hands and feet tied, and thus left. A part of the gang supposed to be engaged in this transaction were arrested, and one of them sufficiently identified to hold him for trial. Early this morning this same young lady was found in the canal slip attached to the boat yard of Messrs. VanSlyke, Allen & Co., with her feet and hands tied, and a gag in her mouth. She was discovered by some canal drivers who went to water their horses, and when found was nearly dead, her life having been preserved by her floating upon the shore, where she was enabled to rest her head. She was taken to a house near by, where she is doing well. She says that she was seized last night about 11 o'clock, by some men, when in the back yard of her boarding house—near the corner of Pearl and Court streets—and gagged and bound, and carried and thrown into the canal. There seems to be something quite strange about the affair. She says that on Thursday night last she was seized while in the hall of her boarding house and served in a similar manner, and carried to a pond near the gas works, where she was left with a large stone placed upon her person, but that this was not made public, in the hope that by keeping it private the perpetrators of the outrage might be discovered. The whole transaction is involved in considerable mystery, and exhibits upon its face a series of daring outrages, which we hope will call out the best exertion of our police.—Buffalo Com. Sel.

THE SUICIDE CASE AT THE CITY HOTEL. The mystery hanging over the heroine of the attempted tragedy at the City Hotel has been cleared up. The name of the young lady, who has been ill there from taking arsenic and laudanum with the purpose to destroy herself, is Mrs. Mendel. Her husband is represented to have recently died, and unpleasant relations with her father, who is a wealthy planter and merchant of Charleston, South Carolina, plunged her into that state of mind, from which she sought relief in self destruction. Her brother came from the South on Saturday evening, and the sister having recovered from the effects of the poison, returned in his company on Monday to the parents' home, a step to which, we understand, she was partially reconciled before leaving. The name of her father we are not at liberty to give.—Springfield (Mass) Rep.

THE PROVIDENCE JOURNAL, who has watched these matters with more attention than any other paper in the country, is decidedly of opinion that Sir John Franklin is still alive. They suppose he is further to the West and North than the English navigators have imagined, and that he is rather to be sought for through Behring's Straits. It is supposed he might have entered that Sea which is believed to lay around the Pole, and have progressed too far to the West to be reached through Baffin's Bay. Some navigators, after passing over the immense icy barrier, have discovered an open sea beyond, through which Sir John may have passed.

STEAMBOAT RACING.—The Minnesota Chronicle of the 27th ult., says that the steamboats Nominee and Franklin, on their recent trip to St. Paul, went out of their way to race. The Franklin did not stop to discharge her freight, so eager was she in the race, and having started ahead, she laid two some fifteen minutes waiting for the Nominee, during which time she did not blow off steam nor dampen her fires. The passengers were greatly excited, and there was high betting. Of course, after reading such things, we need not wonder at the frequency of steamboat calamities.

FRAUDS IN GUANO.—It is said that there are manufactories of spurious guano in Liverpool; and that so closely does it resemble the real article, that few can detect it, except by analysis. This article, on an analysis was found to contain but 21 per cent, of the substances which give guano its value, the remainder consisted of sand and plaster of paris.

LICENSING IN PROVIDENCE.—At the late municipal election in Providence, the question of licensing to sell spirituous liquors was submitted to the people and decided in the negative, yeas 71, nays 142.

OPINION OF THE ENGLISH PRESS ON PROF. WEBSTER'S TRIAL.—This remarkable trial, as was supposed, has attracted much attention in England, where the report seems to have been read with as much avidity as in this country. *Wilmer's European Times*, in a long article on the subject, and the manner in which the trial was conducted, says, "the most invariable, fair, unexaggerated tone in which testimony was borne; the judicious manner in which legal acuteness was tempered and restrained by a regard to what was just and morally decorous; the patient discrimination with which judge and jury followed the long and tangled chain of evidence, were all highly honorable to the men of New England."
 "Every thing in these remarkable and protracted proceedings concurred to produce an indelible conviction of the guilt of the accused." In comparing this trial with some of the remarkable cases in England, the same paper has the following remarks:—

"The character of Professor Webster and his crime, as they are revealed by the judicial investigation, have many striking features of resemblance to earlier cases. In the cool premeditation of the murder, and the means resorted to for the purpose of averting detection, the conduct of the learned, accomplished and pleasing professor, bears a striking resemblance to that of the untaught brute Daniel Goode. The professor's character, his uncontrollable appetite for the elegant luxuries of life, his pleasing and engaging exterior, his limited means and embarrassments, and the callous manner in which he sacrificed the life of another to ensure the means of enjoyment, make some slight approach to the demoniacal Wainwright. The over-weening confidence displayed by Webster in his own nerve and resources, and the fact that his ambition to make an ingenious defence contributed in no slight degree to rivet the conviction of his guilt, reminds one of his brother pedagogue, Eugene Aram. Even in purely fortuitous and important incidents the trial recalls some that have preceded it. As in case of the Mannings, the false teeth of the deceased became important adjectives of evidence."

ROYAL SWINDLING.—King Ferdinand, of Naples, with the royal view of replenishing his exhausted exchequer, issued a proclamation declaring Messias a free port.—Those who were simple enough to believe the word of a king, entered the port and stored their commodities; but when they attempted to sell or export them, they were politely informed that his august majesty had changed his royal mind, and would tax every cent's worth of foreign produce in the port. The merchants remonstrated, but in vain; they even asked permission to withdraw their goods and depart as they had entered, but this was also denied.

His Majesty would not allow anything that had entered Messina, agreeably to his proclamation, be either withdrawn or sold, without first paying an enormous duty of over 100 per cent. on its value. Among those who have been thus entrapped and swindled, are several merchants of this city, some of whom have the duties under protest. We understand that they have represented their case to our government, and claims its protection against the outrageous proceedings of the royal robber.

Boston Atlas, Saturday.
 A SOUTHERN GENTLEMAN AT THE NORTH. A gentleman by the name of J. T. Singleton, from New Orleans, arrived in this city of Gotham, on Thursday last, and put up at French's Hotel. During the afternoon, Mr. Singleton sallied forth for a stroll about town, to see the sights, and perchance to view the "Elephant." Early in the evening, sure enough, the "elephant," appeared, in the shape of a female in petticoats, called Biddy Melan, who, after a short consultation, induced the Southerner to visit her domicile, situated at 29 Elm street.—Here he reposed himself until morning, when, to his surprise, on waking up, he missed \$130 in gold, which he had in his pocket prior to going to rest. Officers Downing and Woolbridge arrested Biddy on the charge of stealing the same.

N. Y. Herald.
 POWER OF PARDONING IN MASSACHUSETTS.—The pardoning power does not, as many suppose he in the Governor alone. In all executive acts, the Governor of Massachusetts is assisted by nine constitutional advisers, called a Council. Among other committees, one on pardons is appointed. Before this committee, the applicants for pardon or commutation of punishment are obliged to appear by their counsel, and arguments are heard. This committee reports their decisions to the Governor in council, and it is almost always accepted, or, at least, form their basis on their subsequent action.

THE CROPS.—We hear good news of the Peach crop from Delaware, Northern Ohio, Maryland, and elsewhere. The Peach growers apprehend only that the price will be too cheap. The same may be said of the Long Island crops. A fruit dealer in Fulton Market, who has an orchard of 11,000 trees on Long Island, states to us that the prospect of an abundant yield was never so fair, and that they would be entirely too cheap the coming season.

The Tobacco crop also promises well in the Tobacco growing States.

N. Y. Express.
 SAD TRAGEDY.—The Bangor (Me.) Whig, says that in Atkinson, Piscataquis County, on Monday last, Mrs. Hutchinson, formerly of Glenburn, in a fit of derangement attempted the destruction of herself and three children. Two of the children are dead, but the youngest child will probably survive, and Mrs. Hutchinson was not dead at last accounts, but it is thought will not recover.

CALIFORNIANS.—The Iowa City Republican, states that two thousand California teams have passed that town on their way across the plains. Allowing three men to each team, they will make six thousand and the whole number of adventurers in search of gold.

HOMICIDE AT THE STATE PRISON.—The Coroner of this village, S. W. Smith, was called and a jury sworn, to hold an inquest upon the body of a convict who had died in consequence of wounds inflicted by a fellow convict. The particulars, as we learn from one of the jurors who noted down testimony, were as follows: George Miller, a native of Scotland, a desperate convict, had been sent by his keeper from the hill quarry to the hall of the prison for punishment; on his way there he met with another convict, named Reuben Nixon, toward whom he had bitter enmity, and beckoning him into the arch-passageway, made a deadly stab at his heart with the sharpened point of a file, evidently prepared for the purpose; but striking the bone the blow was not fatal; and Nixon having a shovel in his hand, returned the assault with a blow or two on the side of Miller's head, which felled him to the ground and made him senseless. Nixon immediately ran with alarm to the warden, exclaiming, "I fear I have killed a man!" Miller was then taken up, conveyed to the hospital, resuscitated, his wounds dressed by the assistant, (the physician being absent,) and for several days it was hoped he would recover, but at length he was seized with convulsions or spasms, and died in just a week from the time he was wounded.

With these facts before them, and the keepers giving Nixon, the colored convict whose life was assailed, a favorable character, the jury rendered the verdict, that George Miller came to his death by a blow or blows inflicted by Reuben Nixon, in self-defence; otherwise, justifiable homicide. Whoso useth violence, shall fall by violence.—*Sing Sing Herald.*

EMIGRATION FROM IRELAND.—It appears by the Irish papers, that arrangements have been made for an extensive emigration of the middle classes of the rural population to the United States. In Galway large numbers of people daily crowd the quays securing passages across the Atlantic. They are described as "exhibiting in their appearance a degree of comfort and independence hitherto unknown among emigrants." The Limerick Chronicle, in speaking of the same subject, remarks that "a superior class of persons, in many instances, are leaving the country, consigning to us a miserable lot of beggars, with whom our streets are crowded every hour in the day."

This emigration of the better class of Irish farmers has had a corresponding effect on the value of land. Many landlords have already reduced their rents and thereby retained their tenants. Others, unwilling to make a reduction, have found their best tenants leaving them and emigrating to America. "In many parts of the South and West there are scarcely able-bodied men left to cultivate the land properly."

A correspondent of the Northern Whig, who had been sent to examine the midland and southern counties, says that "in Clare one of the landed gentry has five thousand acres thrown on his hands—another has thirteen thousand acres without a hoof on it, except some deer; and more than one family, who formerly kept their carriages and hunter, are now inmates of the union poor house."—*Prov. Journal.*

A SAILOR POISONED WITH DRUGGED LIQUOR.—On Friday evening, Elbridge Smith, one of the late crew of the Ohio, went on a cruise in Ann street, and returned to his boarding house, No. 16 Fleet st., in a perfectly stupid state. On Saturday morning he was seized with nausea and spasms in the stomach, which resisted all medical appliances, and he lingered in great suffering till Monday night, when he died. Yesterday, coroner Smith, held an inquest on the body, and among other witnesses Drs. E. B. Moore and A. B. Malcolm were examined, they having made a post mortem examination. The jury found a verdict, "that the existing cause of death was his having been drugged with some vegetable poison, to the jury unknown, administered to him in beer or other liquor, by a woman unknown, in a cellar in Ann street on Friday night." He had considerable money on Friday night, when he walked out, but only brought back four cents.—*Boston Post.*

WASHINGTON'S FAREWELL ADDRESS.—The Mercantile Library has received from James Lenox, Esq., a beautifully printed copy of Washington's Farewell Address, being a literal copy of that renowned document, prefaced by two finely engraved portraits after the pictures of Peale and Stuart. Appended are the statement of Mr. Claypole and some other documents showing the history of the Address. It will be recollected that Mr. Lenox was the purchaser (last Winter) of the original manuscript of this Address, for the sum of \$2,500, we believe. He has caused to be printed 54 copies folio, and 175 quarto, which are intended for presents only.—Those institutions and individuals who fall within the circle of his patriotic liberality, may thank the donor for his patriotic liberality.

N. Y. Tribune.
 DISMISSAL OF OPERATIVES.—The Saco Union of Saturday states, that a still further reduction of operatives is to be made in the York Mills at Saco, and the Leconia Mills at Biddeford. The whole number discharged will be about one thousand, and those living out of town were returning to their homes. Such is the change which a year or so makes. There was such a demand for female help within the last eighteen months, that American girls could not be obtained, and manufacturing companies were glad to obtain those from the British provinces, at the usual full prices. But a few, however, were obtained at any price.

ON SUNDAY NIGHT five youthful rogues broke into a store at Ware. Arousing the person who was asleep in the building, they became alarmed and ran; he, being armed with a revolver, called on them to stop, or he would fire; they failed to obey, and he fulfilled his threat by putting a bullet into one of the party, bringing him down, and not giving him a fatal wound. The others, being sold at a decided improvement of prices, were released.

PRINTING CLOTHS.—The President Journal says the sales of printing cloths in that city for the week ending May 11, have been larger than ever before known. One hundred and twenty-eight thousand pieces were sold at a decided improvement of prices.

BROOKLYN AD.
 Some of the customs here are peculiar. Let me pass through a day's routine with you. You are asleep, under mosquito-bars, (lace, or the ordinary net,) and early in the morning the servant enters, puts aside the guard, and hands you a cup of hot coffee, (goat's milk improves the flavor,) this gives you courage to rise and take your bath, and after that your ante-breakfast walk. This is the only hour for wearing out shoes. All the shopping and marketing is done before eight o'clock, A. M. About this hour you return to breakfast—a hearty meal. Then comes the hottest part of the day, for the land-breeze ceases to blow, and the sea-breeze is yet asleep. You read, lounge, and slap at the mosquitoes. About eleven o'clock the trade visits you, at first blowing gently, but ere long slamming too the doors, floating back the curtains, and fluttering the leaves of your book. They call it "the doctor," because it comes laden with health. This continues until four o'clock in the afternoon, and makes the day delightful. When this island is more known in our country, it must become a great resort for invalids, especially for those with pulmonary diseases. A gentleman who had resided here for several years, told me that he had witnessed the most wonderful recoveries of consumptives who had come to this island from Great Britain. It is the Italy of America.

MURDER AND SUICIDE.—A correspondent of Boston Bee, writing from Nashua, N. H., on the 14th, says:—"There was a most shocking murder and suicide committed this morning. A man named J. Hart Allen, about 50 years old, living on Myrtle street, in one of the houses belonging to the Nashua Corporation, murdered his own child, a little girl two years old, this morning, by tying a cord around her neck and strangling her. He then went to the privy connected with the house, and hung himself, where he was found at five o'clock." Rum is said to be the cause of this inhuman trickery. Mr. Allen, says the correspondent, was formerly a respectable and worthy citizen, but for several years past has been very intemperate. His wife and children are very worthy and much respected, and have for some time past supported him and the family by their industry; they have made every effort in their power to save him, but finding their prayers and entreaties of no avail, they finally called at those places where he drank, and begged the keepers to sell him no more liquor.—This exasperated him, and perhaps led to the act of vengeance now recorded. Mrs. Allen was in another part of the house, attending to a sick child when the tragedy occurred.

ACCIDENT AND NARROW ESCAPE.—Yesterday afternoon, as the half-past two o'clock train of cars from Huxbridge was coming into this city, and when just above the freight depot of the Boston and Providence company, an accident occurred which came very near being accompanied with a loss of human life. A countryman with a charcoal wagon was crossing the line of the road, when the cars came in sight, and on noticing their approach, immediately attempted to back his horse from the track. In this he was unsuccessful, and the man had barely time to spring from his car, before the engine struck his horse and wagon, killing and mangle the former and making a complete smash of the latter. We did not learn the name of the man who thus unluckily lost his horse and car, and very luckily saved his own life.

PROVIDENCE POST.
 THE LARGE AMOUNT OF STOCKS purchased by Europeans in the United States, for several months past, is attracting much attention. The transfers of government to foreigners, are stated to have been half a million dollars in a week, for some months past. Much of this is purchased by people in France, distrustful of the value of property in that country. While these heavy investments of foreign capitalists ease our money market at the present time, and enable us to pay more easily for our large imports, there is reason to fear that they may hereafter tax us heavily in payments of interest money to be sent abroad.

MRS. MILLER.—The father of this lady has recently died, as supposed from the extraordinary excitement which the newspaper articles in relation to the elopement of his daughter, caused him.

There is no doubt, in our mind, but Mrs. Miller committed suicide at Niagara Falls; and the reports since circulated of her having been seen in several parts of the United States at the same time, are fabulous. Our contemporaries ought to be more careful in giving circulation to mere rumors in a case of this kind.

BROOKLYN AD.
 PRINTING CLOTHS.—The President Journal says the sales of printing cloths in that city for the week ending May 11, have been larger than ever before known. One hundred and twenty-eight thousand pieces were sold at a decided improvement of prices.

NEWPORT MERCURY.
NEWPORT.
SATURDAY MORNING, MAY 18, 1850.
Final Notice.
The Co-partnership heretofore existing under the firm of
J. H. BARBER & SON,
being dissolved by the death of the late partner, all persons having demands against said firm are requested to present the same for settlement, and all persons indebted are called upon to make immediate payment to
WM. LEE BARBER,
Surviving Partner.

THE COURT OF COMMON PLEAS commences its session in this town, on Tuesday next.

PETERSON'S MAGAZINE has been received. It contains as usual, a variety of entertaining matter, and evinces taste and talent on the part of the editor. Its terms are very reasonable.

BAITMAN'S MAGAZINE for June, is before us, sustaining all the spirit and good taste with which its previous numbers have been marked. Its embellishments are executed in a masterly manner. Call at Tilly's and subscribe.

CLAY'S LADY'S BOOK for June has 15 engravings and 27 contributors, and as it advances continues to increase in interest and in the elegance of its execution. For sale at the Book-stores.

THE LONDON QUARTERLY REVIEW has been sent us by L. Scott & Co., of New York. It contains a collection of well-written and instructive articles. Published at 79 Fulton street.

The Providence Journal copies our article respecting the sad accident to Dennis Shannon, and credits "Newport Mercury 5th inst." "Mercury" very like "Advertiser." N. Imports. Daily Advertiser of Saturday.

Not too fast Mr. Advertiser. The article alluded to, and claimed as yours, was sent by us to the Journal office, on Tuesday 7th inst., two hours before the Advertiser was out.

The astonishing success of OAK HALL, Boston, in the clothing trade, is owing to the fact that W. W. Simmons has adopted a system in doing business adapted to the wants of the public. Shoppers visiting Boston should not fail to pay a superb establishment a visit and make their purchases.

Look out for THIEVES.—A daring robbery was perpetrated in this town yesterday afternoon, by two scamps who came down in the Perry from Providence. They entered the house of Mr. Samuel Westcott, and took therefrom a gold watch and several rings, valued at \$100. Officers Beale and Heath, went in pursuit, and after much trouble succeeded in arresting them both. They will be examined this morning.

A COMPANY is said to have been formed in Boston, with a capital of \$15,000 called "The N. E. Matrimonial Agency Co." Gentlemen in want of wives, and ladies in want of husbands, pay \$3 and have their names registered. This done, they are entitled for one year to receive introductions and other assistance from the Company.

THE STEAMERS Georgia and Cherokee sailed from New York on Monday for Chagres,—the former with six hundred and ten passengers, and the latter with three hundred and three passengers, all bound for California.

THE FORREST DIVORCE CASE.—A bill to annul the marriage contract between Edwin Forrest and Catharine his wife, was read in the Pennsylvania Senate, on Friday. A point of order was raised upon its reception, and it was ruled out, on an appeal against the decision of the speaker by a vote of 18 to 9.

No LESS than six ladies had their pockets picked in Boston on Friday last. All these robberies were perpetrated in stores, by female thieves, who are said to be numerous in Boston at the present time.

COLLISION AND STEAMBOAT ACCIDENT.—The steamboat Bay State, Captain Brown, on her trip from Fall River this morning, when off New Haven, came in contact with a brig. The steamer started her stem, and the brig sunk to the water's edge.

THE METHODIST EPISCOPAL CHURCH South, are holding a General Conference at St. Louis, Missouri. The whole South except Florida is represented in Conference.

THE YEARLY MEETING of the Pennsylvania Society of "Friends" will commence in Philadelphia on Monday next. The Cherry street meeting house will be used by the female portion of the Friends, and the Green street meeting house by the males.

The New York Yearly Meeting is to be held on the 27th.

A DECREE of divorce has been granted in the Supreme Court in Boston, on the ground of habitual intemperance on the part of the husband, and neglect to provide for his family for six years.

CHOLERA IN HAVANA.—An extract from a private letter, dated May 2d, states that the cholera is quietly on the increase there and yellow fever very prevalent. The deaths by cholera are about 80 per day in a population of 180,000, to say nothing of common disorders. The authorities have made good provision in the way of extra hospitals but I have heard of few recoveries. The disease is at present chiefly among the negroes and drinkers; nevertheless, a few of the better class of whites have been carried off.

Mrs. FRANCES S. OSGOOD, one of the sweetest of Poetesses, one of the loveliest of women, of whom her country, as well as a wide circle of appreciating friends have long been justly proud, is dead.

THE COST OF RIOTING.—There has been paid by the county of Philadelphia for rioters, including pay of military and expense, since the year 1842, up to 1849, inclusive, \$174,866 84.

Mr. Editor:
Anxious that your readers should be fully acquainted with all that is going on in the business world, and that they should avail themselves of the opportunities offered of obtaining at a low rate, correct information on every important move in trade and commerce, I avail myself of the liberal offer of your columns, and at once beg leave to call their attention to a work (Hunt's Merchants' Magazine), that will give them a better idea of the laws of trade, the cause, effect and final result of the movements around them, and show more forcibly than by any other argument, the wretched state of our commercial affairs.

On reading a single number of this valuable work, one can contrast our neglected trade, our empty docks and our want of life and energy, with towns and cities, (now enjoying the highest commercial importance) that once depended on us, not only for manufactures, but also for importations. They have encouraged commerce and all its accessories, while we, from neglect have lost that which we had, and are fast, very fast, sinking into insignificance—our waters whitened only with the sails of more enterprising neighbors—our beautiful isle valued only as a fashionable resort.

It is not necessary to inquire into the cause of this depression, suffice that we are suffering from its effects, and should turn all our attention to the removal of the evil and the recovery of our lost trade.—Can we accomplish this in any other way than by comparing our position with, and endeavoring to equal in commercial importance, towns and cities that can never possess the natural advantages with which we are surrounded? Such undoubtedly should be the first step, and to do this successfully we must obtain some statistics, some facts connected with their trade, that will satisfactorily account for their rapid advancement.

Hunt's Merchants' Magazine supplies all these wants and monthly lays before its readers a full and accurate report of the movements in the commercial, agricultural and manufacturing world. Without such a guide, a merchant can never cope successfully with trade; he cannot very safely, now ship with certainty—in a word, he can no more expect a sure and favorable return for his investment than he can keep the run of the home market without subscribing to a good newspaper. The rule applies to both, and the man that would be successful in the world must furnish himself with such guides.

Of the Merchants' Magazine, I would speak fully and urge upon the business men of the community the importance of becoming possessed of it, but I wish not to encroach on your limited columns and therefore only ask them to obtain a single number through the agent, Mr. C. E. Hammett, jr., and if not fully convinced of its importance, let the matter rest there.

In closing, I beg leave to give a passing notice of the May number, which is before me, touching only on the heads of the most important articles.

A highly interesting article on California, the best that has appeared, with a table of all the gold mines of the world and their positions. Interest of money; Price; an elaborate and to the Merchant an exceedingly valuable article. A sketch of Charleston, S. C., being No. 29 of a series of sketches of the commercial towns and cities of the union. The position, climate and resource of Charleston are described, a portion of its early history is given, which is followed by tables showing all the imports and exports for the last twenty-five years. The increase and decrease in the sale of each article is carefully noted, so that a merchant, with such a guide, can scarcely make a false step. A long article on Currency—Interest—Production. No. 11 of the Commercial Code of Spain—mercantile ships and vessels. Tea and the Tea trade, part 3d. Trade (with accurate tables) of Alexandria, Egypt, in 1849—Agriculture and other productions of Cuba in 1849. Canadian and American Tariffs compared. Railroad, Canal and Steamboat statistics. Debts and Finances of the State of Ohio. Banks and Bank capital of S. Carolina. Connecticut, &c., Location and amount of produce of every Factory in Connecticut, (the April number contained a list of R. I. Factories.) The Iron trade of Pennsylvania. Process of making Axes. Nautical intelligence. Mercantile, Miscellaneous, &c. &c.

A JOKE FOR THE LADIES.—The editor of a paper in Providence, lately informed his readers that the ladies always pull off the left stocking last. This, as may be supposed, created some little stir among his fair readers, and while in positive terms they denied the statement, they at the same time declared that he had no business to know it, even if such was the fact, and pronounced him no gentleman. He proved it, however, by a short argument; when one stocking is pulled off first, there is another left on—and pulling off that is taking off the left stocking last.

FEMALE MEDICAL COLLEGE.—The Legislature of Pennsylvania has chartered a College for the Medical education of Females, to be located in Philadelphia. The act confers all the privileges enjoyed by any other medical school in the State. The government is invested in Corporators and a board of twenty-four Trustees, who have been appointed. It will be opened for pupils the middle of October, the time other medical colleges commence their winter sessions. Elizabeth Blackwell, M. D., is talked of for the chair of Surgery.

THE LOWELL MURDER.—The suspicious appearances which gave rise to a rumor of a murder having been committed in Lowell, were occasioned by two men who got mad at each other, and undertook to settle their difficulties by a fight. The only injury done was the spilling of a little bad blood.

THE GARTOWN GAZETTE says that Massachusetts, last year, spent \$1,000,000 in smoking and chewing tobacco, and earned in braiding straw.

The steamer HIBERNIA, with one week's later news from Europe, arrived at Boston yesterday morning at 5 o'clock.

ENGLAND.—Beyond the fact that the Ministry have been again left in a minority on a point of little moment, the proceedings of Parliament possess no general interest.

Queen Victoria was safely delivered of a Prince on the 1st of May.

FRANCE.—Eugene Sue received full one-half the votes of the Army of Paris, and beat his opponent by 8,000 votes.

The election passed off quietly. The Socialists are greatly elated.

Brighton Market, Thursday, May 16, 1850.

THE MISTAKE OF A LIFE-TIME.—This highly interesting work which is now in course of publication and will be completed in 12 numbers, is regularly received at TILLEY'S, where the back numbers can be obtained. Price 124 cts. per number, four of which are now published. [May 18.]

Court of Probate, Portsmouth, holden May 13, 1850.
An instrument in writing dated January 24, 1849, purporting to be the last Will and Testament of

JOHN E. CORNELL,
late of Portsmouth, dec'd, Cooper: wherein Edward Wilson is named as Executor thereof, was presented to this Court for Probate and Letters testamentary thereon; and said Edward Wilson informs this Court that he should not except the trust of Executor of said Will, and wished the Court to appoint some other person, Administrator with the Will annexed.

It is ordered that the same be received and the consideration thereof be referred to a Court of Probate to be holden at the Town Hall in Portsmouth, on the second Monday of June next, at 1 o'clock P. M. and that previous notice be given in the Newport Mercury, for successive weeks that all persons interested may appear at said time and place and show cause why said Will should not be proved and approved, and an Administrator appointed, with the will annexed.

By order,
RICHARD SHERMAN, Probate Clerk.

NOTICES, at the low price of one Dollar per pound, for sale at the Cheap Store of

[May 4.]

Spencer's Vegetable Pills.
THIS invaluable medicine has already been subjected to the thorough test of the experience of twenty years. The knowledge of its usefulness has been constantly increasing with its proportionate increase of sale. If certificates are of use in recommending this article, the subscriber has probably more of them than can be produced in favor of any other vegetable Pill in the New England States. The subscriber has many certificates recommending them in cases of headache, sick or nervous dyspepsia, coughs, spitting of blood, liver complaint, scrofula, hysterical fits, Piles, pain in the side, stomach, &c. They are of especial value as a spring medicine in purifying the blood. The patient is relieved of a violent headache or pain in the side in one hour and sometimes in fifteen minutes after taking from two to four Pills. Their efficacy has been tested by the experience of thousands, and they have proved themselves the best family medicine which has been offered to the public. They are what they purport to be, purely vegetable, of the most innocent roots and herbs of the growth and production of New England.

Books, containing certificates, &c., can be had of the agents, and each box has directions accompanying it.

The Pills will continue to bear the same name, and the wrappers will be signed by me, and without this, or the signature of G. Spencer, none will be genuine.

THEOS. J. SPENCER, Sole Proprietor.
This article may be obtained of ELIZABETH STANLEY, Spring st, Newport, and of the principal druggists. [May 11, 1850.—3w.]

ADMINISTRATOR'S SALE.
PURSUANT to a decree of the Court of Probate of the town of Newport, the subscriber will sell at Public Auction on SATURDAY, the 16th of June 1850, at 10 o'clock, A. M., on the premises—all the right, title and interest which Benjamin Fairbanks had at the time of his death, in and to a Lot of Land, with a Dwelling House and other buildings thereon standing, situated in the South part of the Town of Newport, and bounded Northerly on the Bowery street, Easterly on land late of Esther Fleet, Southerly on land of William Townsend, and Westerly on Anthony street. And also, in and to, one undivided fifth part of a Lot of Land with a Dwelling House and other buildings thereon standing in said town of Newport, bounded Northerly on Young street, Easterly on Spring street, Southerly on land of J. Peabody, and Westerly on land of E. Clarke, or so much thereof, as will be sufficient to raise the sum of five hundred and seventy-six dollars, and fifty-six cents, with incidental expenses.

Newport, May 11, 1850.
P. P. REMINGTON, Administrator,
with the Will annexed on the Estate of Benjamin Fairbanks.

VAYER'S
CHERRY PECTORAL:
For the Cure of
COUGHS, COLDS,
HOARSENESS, BRON-
CHITIS, CROUP, ASTH-
MA, WHOOPING-COUGH
AND CONSUMPTION.

In offering to the community this justly celebrated remedy for diseases of the throat and lungs, it is not our wish to trifle with the lives or health of the afflicted, but frankly to lay before them the opinions of distinguished men and some of the evidences of its success, from which they can judge for themselves. We sincerely pledge ourselves to make no wild assertions or false statements of its efficacy, nor will we hold out any hope to suffering humanity which facts will not warrant.

Many proofs are here given, and we solicit an inquiry from the public into all we publish, feeling assured they will find them perfectly reliable, and the medicine worthy their best confidence and patronage.

FROM BENJ. SILLIMAN, M. D., L. L. D., &c.
Professor of Chemistry, Mineralogy, &c., Yale College, Member of the Lib. Nat. Med. Phil. and Sciences Societies of America and Europe.

"I deem the CHERRY PECTORAL an admirable composition from some of the best articles in the Materia Medica, and a very effective remedy for the class of diseases it is intended to cure."

NEW HAVEN, Ct. Nov. 1, 1849.
PROF. CLEVELAND, of Bowdoin College, Me. Writes—"I have witnessed the effects of your 'CHERRY PECTORAL' in my own family and that of my friends and it gives me satisfaction to state in its favor that no medicine I have ever known has proved so eminently successful in curing diseases of the throat and lungs."

REV. DR. OSGOOD.
Writes—"That he considers 'CHERRY PECTORAL' the best medicine for Pulmonary Affections ever given to the public," and states that "his daughter after being obliged to keep the room four months with a severe settled cough accompanied by raising of blood, night sweats and the attendant symptoms of Consumption, commenced the use of the 'CHERRY PECTORAL' and had completely recovered."

HEAR THE PATIENT.
T. S. HOTEL, SARATOGA SPRINGS, July 5, 1849.

Dr. J. C. AYER—Sir: I have been afflicted with a painful affection of the lungs, and all the symptoms of settled consumption, for more than a year. I could find no medicine that would reach my case, until I commenced the use of your 'CHERRY PECTORAL,' which gave me gradual relief, and I have been steadily gaining my strength till my health is well nigh restored.

While using your medicine, I had the gratification of curing with it my revered friend, Mr. Truman, of Sumpter District, who had been suspended from his parochial duties by a severe attack of bronchitis.

JACOB WEAVER.

Newport, April 20, 1850.

Littell's Living Age.

E. LITTELL & CO.,

CORNER OF TREMONT & BROMFIELD STS.

This work is conducted in the spirit of Littell's Museum of Foreign Literature, (which was favorably received by the public for twenty years) but as it is twice as large, and appears so often, the editor not only gives spirit and freshness to it by many things which were excluded by a month's delay, but while thus extending his scope and gathering a greater and more attractive variety, is able so to increase the solid and substantial part of his literary, historical, and political harvest, as fully to satisfy the wants of the American reader.

The elaborate and satisfactory Essays of the *Edinburgh Quarterly*, and other Reviews; and *Blackwood's* noble criticisms on Poetry, his keen political Commentaries, highly wrought Tales, and vivid descriptions of rural and mountain scenery; and the contributions to Literature, History, and Common Life, by the sagacious Spectator, the sparkling Examiner, the judicious Athenaeum, the busy and industrious Literary Gazette, the sensible and comprehensive Britannia, the sober and respectable Christian Observer; these are intermixed with the Military and Naval reminiscences of the United Service, and with the best articles of the *University*, *New Monthly*, *Fraser's*, *Tait's*, *Ainsworth's*, *Hood's*, and *Sporting Magazine*, and "Chambers' admirable Journal." He does not consider it beneath his dignity to borrow wit and wisdom from *Punch*; and, when he thinks it is good enough, makes use of the thunder of *The Times*.

The steamship has brought Europe, Asia, and Africa, into our neighborhood; and will greatly multiply our connections as Merchants, Travelers, and Politicians, with all parts of the world; so that much more than ever it now becomes every intelligent American to be informed of the condition and changes of foreign countries. And this is not only because of their nearer connection with ourselves, but because the nations seem to be hastening through a rapid process of change, to some new state of things, which the merely political prophet cannot compute or foresee.

Geographical Discoveries, the progress of Colonization, (which is extending over the whole world,) and Voyages and Travels, afford favorite matter for his selections; and, in general, the editor systematically and very fully acquaints his readers with the great department of Foreign affairs, without neglecting our own.

While the Living Age is desirable to all who wish to keep themselves informed of the rapid progress of the movement—to Statesmen, Divines, Lawyers, and Physicians—to men of business and men of leisure, it will be found to be equally attractive and useful to their wives and children. It is indispensable to every well informed family. We say *indispensable*, because in this day of cheap literature it is not possible to guard against the influx of what is bad in taste and vicious in morals, in any other way than by furnishing a sufficient supply of a healthy character. The mental and moral appetite must be gratified. By "satisfying the thirst from the chaff," by providing abundantly for the imagination, and by a large collection of Biography, Voyages and Travels, History, and more solid matter, a work to produced well calculated for universal popularity, and to raise the standard of public taste.

This excellent work is published every Saturday, by E. LITTELL & CO., Boston, who supply orders by mail from all parts of the country.—Remit any sum to them and they will send the work to that amount. Each number makes a handsome pamphlet of 84 pages, double col., oct. Price, 12 cts.—or by the year, Six Dollars.—We add to our own recommendation, what our readers will value infinitely more, a letter from the late Ex-President, J. Q. Adams, 1845.

Or all the Periodicals Journals devoted to Literature and Science which abound in Europe and in this country, this has appeared to me to be the most useful. It contains indeed the exposition only of the current literature of the English language, but this by its immense extent and comprehension includes a portrait of the human mind in the utmost expansion of the present age.

Subscriptions rec'd at the office of this paper. Also sold at TILLEY'S News Depot in this town. April 6.—ly.

DR. CHRISTIE'S GALVANIC BELT

BRACELET

MAGNETIC FLUID.

For the Removal and Permanent Cure of all NERVOUS DISEASES, and of those complaints which are caused by an impaired, unbalanced condition of the NERVOUS SYSTEM.

This beautiful and convenient application of the magnetic powers of GALVANISM and MAGNETISM, has been pronounced by distinguished physicians, both in Europe and the United States, to be the most valuable medicinal discovery of the Age.

DR. CHRISTIE'S GALVANIC BELT and MAGNETIC FLUID, and is used with the most perfect and certain success in all the following cases, viz:

GENERAL DEBILITY. Strengthening the weakened body, giving tone to the various organs, and invigorating the entire system. Also in FLEA, GRAPE, PARALYSIS and PALSY, DYSPER SIA, INDIGESTION, RHEUMATISM, LUMBAGO, DEAFNESS, NERVOUS TREMORS, PALPITATION OF THE HEART, ATOPHY, NEURALGIA, PAIN IN THE SIDE and CHEST, LIVER COMPLAINT, SPINAL COMPLAINT, and CURVATURE OF THE SPINE, HIP COMPLAINT, DISEASES OF THE KIDNEYS, DEFECTION OF URINE, BRUISES, and all other NERVOUS DISEASES, which complaints arise from a simple cause—namely,

A Derangement of the Nervous System.

(See NERVOUS COMPLAINTS, Drugs and Medicines increase the disease, for they weaken the vital energy of the already prostrated system, and thus render the life giving, vitalizing influence of Galvanism, as applied by this beautiful and wonderful discovery, the exhausted patient and weakened sufferer is restored to former health, strength, vigour and cheerfulness.

The great peculiarity and excellence of

Dr. Christie's Galvanic Curatives, consists in the fact that they arrest and cure disease by natural application, in place of the usual mode of drug giving and physicizing the patient, till exhausted Nature, once hopelessly under the influence of the medicine, is again restored to health, and the circulation of the blood, granule the secretions, and never do the slightest injury under any circumstances. Since their introduction in the United States, only three years since more than

60,000 Persons including all ages, classes and conditions, among which were a large number of ladies, who are particularly subject to Nervous Complaints, have been cured.

ENTIRELY AND PERMANENTLY CURED, when all hope of relief had been given up, and every thing else had been tried in vain!

To illustrate the use of the **GALVANIC BELT**, suppose the case of a person afflicted with that base of diseases, DYSPER SIA, or any other chronic Nervous Disorder. In ordinary cases, stimulants are taken, which, by their action on the nerves and muscles of the stomach, afford temporary relief, but in a few days the patient is in a lower state, and with injured feelings, after the action thus excited has ceased. Now compare this with the effect resulting from the application of the GALVANIC BELT. It has a powerful influence on the system, as the weak symptoms of an attack, and simply the tie that binds the body, under the Magnetic Fluid is dissolved, in a short period the inextinguishable perspiration sets out on the skin, the patient is in a higher state, and a true and permanent cure is effected, which will pass on to the negative, and thence back again to the positive, thus keeping up a continuous and constant action on the system. Thus the most severe cases of DYSPER SIA are PERMANENTLY CURED. A FEW DAYS OF TREATMENT ARE SUFFICIENT TO ERADICATE THE DISEASE OF VERTIGO.

CERTIFICATES AND TESTIMONIALS Of the most Undoubted Character, From all parts of the Country, could be given, sufficient to fill every column in this paper!

AN EXTRAORDINARY CASE, which conclusively proves that

"Truth is stranger than Fiction."

CURE OF RHEUMATISM, BRONCHITIS and DYSPER SIA

Rev. Dr. Landis, a Clergyman

(A New Jersey, of distinguished attainments and exalted reputation.)

SINCE, New Jersey, July 12, 1848.

DR. A. H. CHRISTIE—Dear Sir: You wish to know of me what has been the result in my own case, of the application of the GALVANIC BELT and NECKLACE. I reply as follows:

For about twenty years I had been suffering from Dyspepsia. Every year the symptoms became worse, and could obtain permanent relief from any course of medical treatment. About fourteen years since, in consequence of frequent exposure to the weather, in the discharge of my pastoral duties, I became subject to a severe Rheumatism, which was not relieved by any of the usual remedies. About four years since, in the winter of 1844 and 45, in consequence of preaching a great deal in my own and various other churches in the region, I was attacked with a severe Bronchitis, and was so severely affected, that I was obliged to suspend my pastoral labors. My nervous system was now thoroughly prostrated, and my Bronchitis became worse, and I was obliged to suspend my pastoral duties. I was now in a state of extreme debility, and my health was so low, that I was unable to perform my pastoral duties. I was now in a state of extreme debility, and my health was so low, that I was unable to perform my pastoral duties. I was now in a state of extreme debility, and my health was so low, that I was unable to perform my pastoral duties.
